

Legacy Platform Migration

Large US Travel Product Company

THE CLIENT PROBLEM STATEMENT

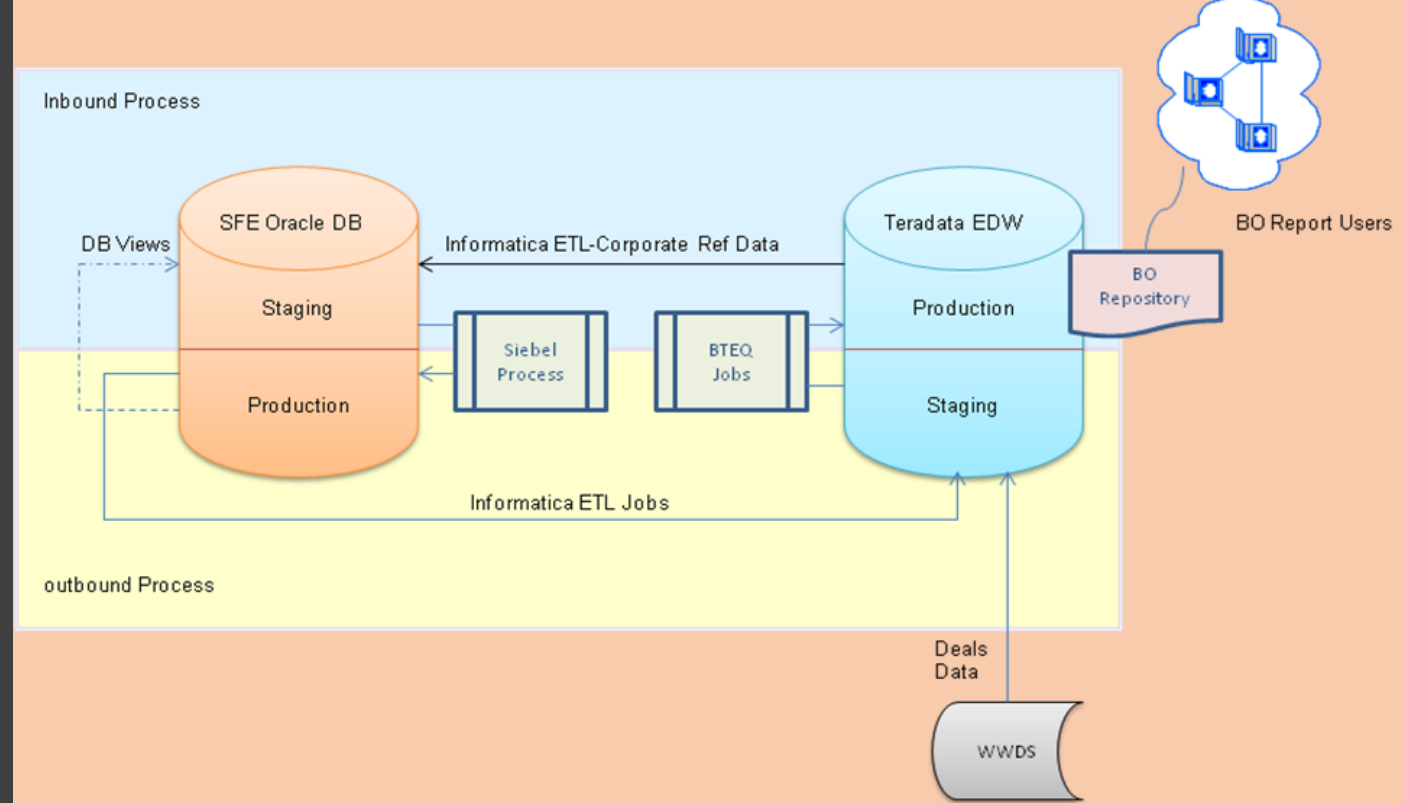

- Re –designing of Legacy data model.
- Replace existing tools which are at the end of their life cycle.
- Replace costly legacy hardware to current low cost hardware.
- Incorporating current and future needs

SOLUTION

- Impact analysis of data model changes.
- Building real-time replication layer using Golden Gate.
- TDW data model enhancements.
- Retro fitment of existing ETL layer to populated Travel Data Warehouse (TDW).

BUSINESS OUTCOME

- Significantly reduced the cost of maintenance.
- Improved time to market by migrating the legacy platform.
