

AdvantageGo Acumen - Insurance Data Warehouse

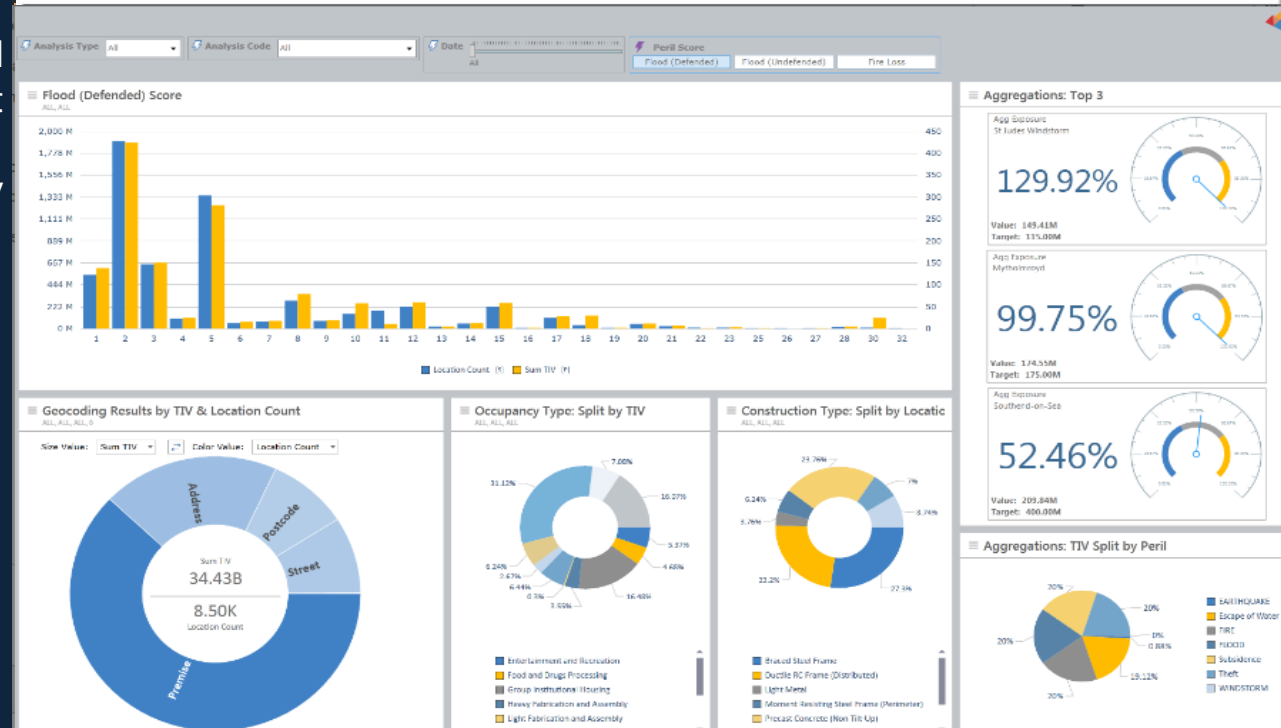

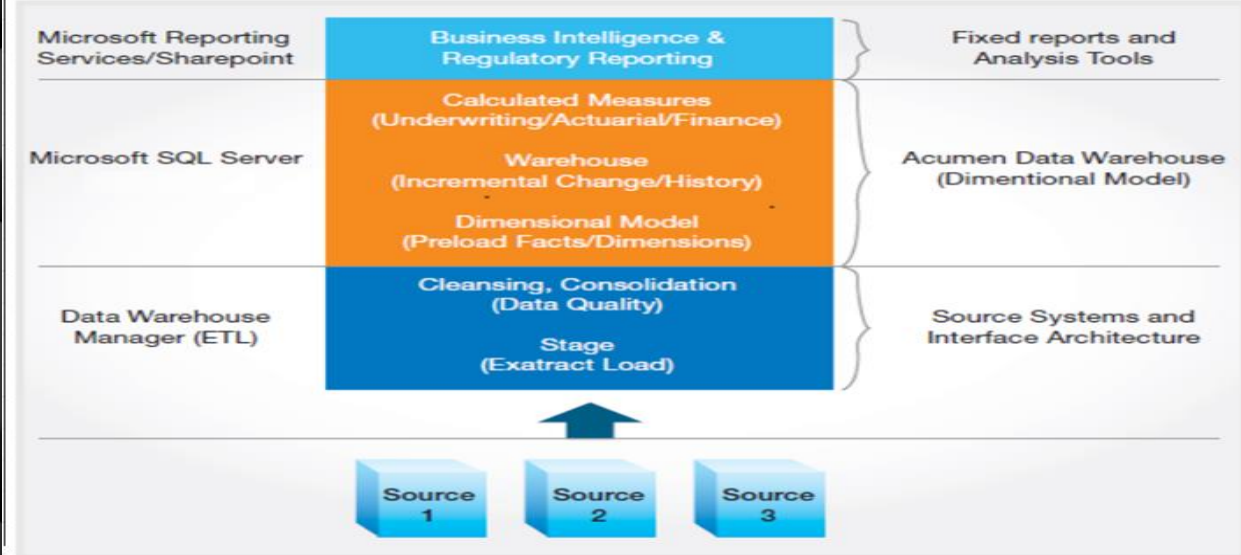

AdvantageGo is the innovative commercial insurance and reinsurance product family from NIIT Technologies

PROBLEM STATEMENT

Acumen, a market-leading analytics solution from AdvantageGo, provides deep and sophisticated analysis across the whole (re)insurance value chain. It does this by turning structured and unstructured complex data into valuable visualizations and insights that drive you towards a high quality and profitable portfolio. Our powerful, real-time contextual analytics help you to be proactive, and not only reactive.

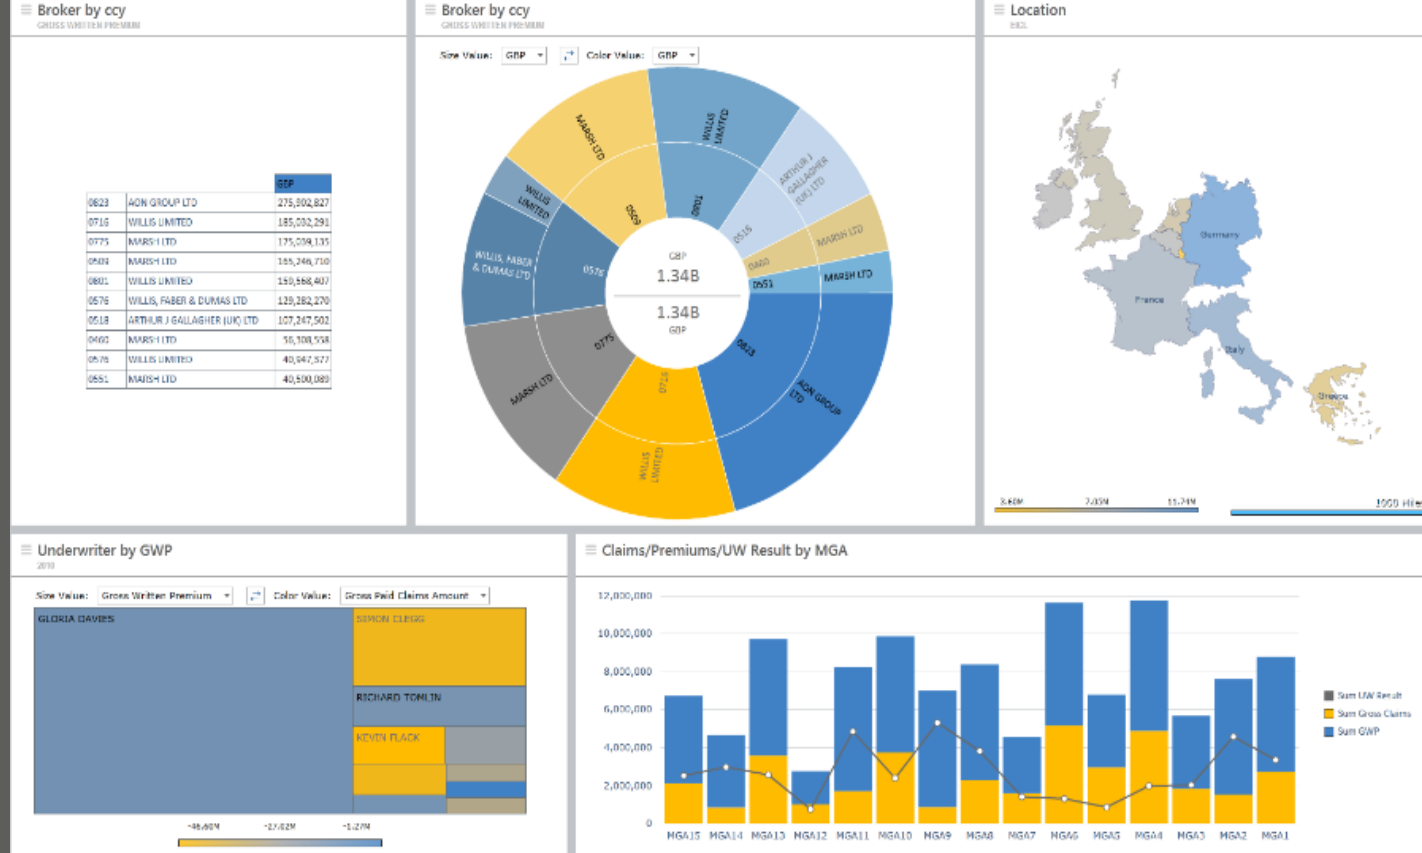

Advantage Acumen

SOLUTION

- Underwriting dashboard showing new business analysis, renewal analysis, predicted premium, premium assessment by geography and broker, and performance analytics
- Operational dashboard showing lost and rejected submissions by reason, workflow trend analysis, and user-level actions analysis
- Catastrophe modelling analytics
- Aggregation modelling analytics
- Claims dashboard
- Broker performance dashboard
- Workflows to support Solvency II and other compliance requirements
- Premium calculation and forecasting to support financial reporting
- Templates to validate information for Lloyd's reporting requirements

BUSINESS OUTCOME

- Analytics that help you to be proactive, and not only reactive
- Tap into powerful, deep and personalised analytics with end-to-end intelligence for your entire organization
- Improve your control and management with valuable insight, intelligently acquired and organized from both structured and unstructured complex data
- Confidently make better, more effective decisions with contextual analytics and user-defined dashboards
- Rapidly identify and capitalize on new opportunities with real-time contextual analytics
